EDUCATION

Degree	Specialization	Institution	Year	Score
B.Tech	Artificial Intelligence	Vidya Jyothi Institute of Technology	2026	8.34
Intermediate	MPC	Sri Chaitanya Junior College	2022	92.7%
Secondary	General Education	Sri Sathya Sai Grammar High School	2020	10.0

INTERNSHIPS / EXPERIENCE [\[View Certificates\]](#)

- **Data Science Intern — Shadowfox Technologies** Dec 2024
 - Completed a Data Science internship developing end-to-end ML projects (Sales Forecasting, AQI Analysis, Fraud Detection).
 - Utilized Python, Pandas, and Scikit-learn for data preprocessing, model building, and evaluation using MAE, MSE, and R².
- **Salesforce-Supported Virtual Internship** Jun–Aug 2025
 - Built CRM-based automation workflows using Salesforce Flow and Apex concepts.
 - Gained practical experience in cloud computing, low-code app development, and CRM automation.

PROJECTS

- **Stock Price Prediction (Apple)** *[Time Series Forecasting, LSTM]* Jan 2025
 - Processed historical stock data using Yahoo Finance API for model training and validation.
 - Built LSTM-based neural networks for accurate time-series forecasting of Apple stock prices.
 - Developed an interactive Streamlit dashboard for real-time visualization and analysis.
- **Stammer Detection & Speech Correction** *[Deep Learning, Whisper, TTS]* Mar 2025
 - Designed an AI pipeline to detect stammered speech and generate fluent audio output using TTS.
 - Integrated Whisper for transcription and emotion detection, with stammer severity evaluation.
 - Applied Deep Learning models for speech fluency correction and emotional tone retention.
- **Age & Gender Prediction from Faces** *[Deep Learning, CNN - VGG16]* Dec 2024
 - Built and trained CNN models (VGG16) to predict age and gender using IMDB-Wiki dataset.
 - Performed preprocessing, augmentation, and noise reduction to improve model accuracy.
 - Developed Salesforce-integrated API as part of Cognizant Hackathon.

ACHIEVEMENTS / HACKATHONS [\[View Certificates\]](#)

- Participated in **ISRO Innovation Challenge**, developing an AI/ML prototype for space applications.
- Participated in **Cognizant Hackathon** – Salesforce Age & Gender API project.
- Competed in 5+ national-level hackathons including **Smart India Hackathon** and **MSME Hackathon**.
- Solved 200+ coding problems on **LeetCode** and 700+ on **CodeChef**.

TECHNICAL SKILLS

- **Programming:** Python, Java, C (basic), SQL
- **Machine / Deep Learning:** Supervised/Unsupervised, CNN, LSTM, NLP, LLM, GAN.
- **Libraries & Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, OpenCV
- **Frameworks / Platforms:** TensorFlow, Keras, (Flask, Streamlit - familer), Google Colab, Jupyter, Git/GitHub
- **Interests:** AI, ML, DL, Data Science, Analytics, Power BI, Excel, Data Visualization, Prompt Engineering.
- **Soft Skills:** Problem Solving, Critical Thinking, Teamwork, Adaptability

CERTIFICATIONS [\[View Certificates\]](#)

- **GenAI-Powered Data Analytics** – Forage (Jul 2025)
- **Machine Learning Essentials using AWS** – AWS Academy (Oct 2023)
- **Python, C, and Data Analytics** – Cisco Networking Academy (Dec 2022)
- **TCS iON Career Edge: Professional & Communication Skills** (Jan 2025)
- **Unstop 30 Days DSA Bootcamp** (Feb 2025)
- **Introduction to Machine Learning** – Simplilearn (Nov 2024)
- **Principles of Artificial Intelligence** – Infosys SpringBoard (Jun 2025)
